PROJECTS

industry 4.0
Jan. 2022 to May 2022
-Led a team in the conceptualization and implementation of an Industry 4.0 project during final year of diploma engineering.
-Conducted research to evaluate the feasibility and potential impact of implementing Industry 4.0 principles in manufacturing processes.
-To optimize production processes, solutions were developed and deployed that integrated IoT, automation, and data analytics technology.
-Experienced in leveraging AI and machine learning algorithms to enhance production efficiency and predictive maintenance.
-Employed AI-powered predictive analytics to optimize supply chain management and streamline inventory control processes.
-Demonstrated ability to problem solve and innovate in industrial settings, which contributes to increased efficiency and productivity.
-I presented the study findings and outcomes to teachers and industry people, and I received great feedback and recognition.

ACTIVITIES

National Player
Competed at the national level in tennis ball cricket, showcasing dedication and sportsmanship.

Table Tennis Captain
Demonstrated leadership skills as the captain of the table tennis team at the hostel.

Sports Head Captain
Led and organized various sporting events and activities as the Head Captain of Games at school.

VOLUNTEERING

Event Oraganiser
-Actively volunteered for multiple college events, fostering community engagement and organizational success.
-Assisted in planning and executing diverse events, including cultural festivals, academic seminars, and sports competitions.
-Collaborated with event organizers in logistics coordination, participant engagement, and venue setup, ensuring seamless event operations.
-Demonstrated strong teamwork, communication, and organizational skills in high-pressure, dynamic environments.
-Contributed to creating vibrant and inclusive campus experiences, enhancing the college community's spirit and cohesion
